

A TOKEN BACKED BY THE TOP CRYPTO VOTING PLATFORM

COINMARKETSTORE V2 (CMSV2) TOKEN

OFFICIAL WHITEPAPER

COINMARKETSTORE.CC

FEBRUARY 01, 2022

FEBRUARY 01, 2022

Overview

COINMARKETSTOREV2 (CMSV2) TOKEN is a simple token that is powered by coinmarketstore.cc; built on the Binance Smart Chain. CoinmarketstoreV2 token symbol is \$CMSV2. We are launching CMSV2 to ensure that the community is rewarded well for its holding power. Apart from its burn mechanism, we will also put a marketing wallet or ensure that publicity is enough to populate the moon. CMSV2 is backed by Coinmarketstore.cc, a website well known for its comprehensiveness regarding crypto projects. This website is particularly worth mentioning because it is the top crypto voting platform worldwide. CMSV2 will be a huge project in BSC tokens because of its frequently visited website, tokenomics, and marketing plans.

Vision

With the increasing rug pull incidents in the binance smartchain tokens across the Pancakeswap, we decided to step forward and use our platform to launch a token that rewards the community in the best possible way. The basic mechanism is the same as other burning systems. The only difference is that we have a notable, and reliable website with really high visitor traffic. We also have trust worthy marketing staff and developers. Moreover, we have lifetime ads at Coinmarketstore.cc. Our project is different from those that rely heavily on marketing wallets, and if buyers don't show up, the projects vanish altogether. That is why it's tokenized. The value is in the number of visits, the number of projects inside, the reputation, and the website it self.

How Does Our System Work

CoinmarketstoreV2 is a Deflationary Token which means the Total Supply is always decreasing, making it more and more rare. That Charges Tax Fees On Everything But Buys. The Fees Charged On All Non-Buy Transactions out of which percentage of the coins are burned, but holding does reward you in the end.

Benefits

CMSV2 is a complete package because of its burning mechanism and tokenomics. Holding more than 1,000,000 tokens of CMS will also qualify the holder for 10% off on ads placement on the website.

To help grow the project, we will be using 6% of the acquired funds to allocate for marketing. This allocation will help increase the value of CMSV2 in long-term period.

We have taken care of the stability of the project, too. Hence, 3% of the funds will be used for the liquidity pool.

As the project's growth continues, we will be looking for partnerships with notable projects soon. We are real so aiming for new listings to grow in the years to come. Once the CMSV2 brand is better established, we will use some funds for charity and leave the rest for marketing and community competitions.

Summary

COINMARKETSTOREV2 (CMSV2) TOKEN is a fresh program to be launched on the Binance Smart Chain. It has received a lot of attention in its first few days of marketing. This program is designed to reward the crypto community, and for this purpose, we have already charted out a plan. To put it concisely, CMS helps the investors and will prove to be a precious project in the crypto space.
